CERTIFICATION

The National Academy of Certified Care Managers (NACCM) endorses the concept of voluntary, periodic certification by examination for all individuals specializing in care management. Certification is one part of a process called credentialing. It focuses specifically on the individual and is an indication of current competence in a specialized area of practice. Certification as a care manager is highly valued and provides formal recognition in the profession of care management.

PURPOSES OF CERTIFICATION

To promote delivery of safe and effective practice as a care manager and to advance the quality of care management services in home and community-based settings and long-term care through the certification of qualified care managers by:

1. Formally recognizing those individuals who meet the eligibility requirements of the National Academy of Certified Care Managers and pass the Care Manager Certification Examination.
2. Encouraging continued personal and professional growth in the practice of care management.
3. Establishing and measuring the knowledge required for the competent, ethical practice of care management.
4. Providing a standard of knowledge requisite for certification; thereby assisting the employer, consumers, public and members of the health professions in assessment of the skills and qualifications of the care managers.

ADMINISTRATION

The Certification Program is sponsored by the National Academy of Certified Care Managers (NACCM). The Care Manager Certification Examination is administered for the NACCM by the Professional Testing Corporation (PTC), 1350 Broadway - 17th Floor, New York, New York 10018, (212) 356-0660, www.ptcny.com.
